

SANKET DONEKAR

Senior UX Designer | Product Designer — B2B SaaS, Enterprise UX, Design Systems, AI-Assisted Product Design

Pune, Maharashtra, India | +91 8149760321 | sanket.donekar@gmail.com

Portfolio: <https://sanketdesign.netlify.app> | LinkedIn: [linkedin.com/in/sanketnetworks](https://www.linkedin.com/in/sanketnetworks)

PROFESSIONAL SUMMARY

Senior UX/Product Designer with 5+ years and 6 products designed across 5 domains — compliance and filing, supply chain, CRM, marketplace, and consumer — spanning B2B SaaS and enterprise platforms. Owns end-to-end UX for workflow-heavy, data-dense systems — from requirement analysis and information architecture through user flows, prototypes, high-fidelity UI, and developer-ready specs — and builds scalable design systems using component libraries, Figma Variables, and tokens. Partners with product, engineering, QA, and business stakeholders to turn operational complexity into usable products, and applies AI-assisted design and design-to-code workflows to reach reviewable responsive prototypes faster.

CORE SKILLS

Product & UX Design: End-to-End UX Design · User Research · User Interviews · Usability Testing · Journey Mapping · Personas · Heuristic Evaluation · Information Architecture · User Flows · Wireframing · Prototyping · Interaction Design · High-Fidelity UI · Responsive Design · Accessibility · Design Thinking · UX Strategy

Enterprise & B2B SaaS: Enterprise UX · B2B SaaS · Complex Workflow Design · Compliance & Filing Workflows · Role-Based Access · Client, Company & Order Management · Dashboard Design · Data Visualization · Requirement Analysis

Design Systems: Component Libraries · Design Tokens · Figma Variables · Variants · Auto Layout · Pattern Documentation · Design-to-Development Handoff · Figma Dev Mode Specs

AI-Assisted Product Design: Prompt Engineering · AI-Assisted UX Ideation · AI-Assisted Prototyping · AI-Assisted Research Synthesis · Prompt-to-UI · Design-to-Code Workflows · Figma MCP · Human-AI Interaction · Conversational UX

Collaboration & Leadership: Stakeholder Management · Cross-Functional Collaboration · Design Reviews · Design Mentorship · Intern Guidance · Developer Collaboration

Domains: Compliance & RegTech · Legal / Business Services · Enterprise SaaS · Supply Chain & Logistics · CRM · Marketplaces · HealthTech / FoodTech · E-commerce

PROFESSIONAL EXPERIENCE

RedBeryl Tech Web Solutions Pvt Ltd | Pune, India

Senior UX Designer | Mar 2024 – Present

- Led end-to-end UX for vState Filings / R-Filings, a B2B compliance and filing management platform — mapped multi-step filing workflows, role-based access, client and company management, order tracking, and notifications, converting manual compliance processes into structured self-service journeys; validated across 12 stakeholder sessions and a 3-month pilot, contributing to 45% faster filing cycles.
- Owned design for AccuShipment (AccuRest), a multi-phase supply chain platform unifying 4 functions (procurement, logistics, finance, warehouse) across 5 stakeholder teams — restructured shipment creation and ops administration into guided workflows, cutting shipment setup from roughly 45 to 8 minutes and daily ops admin from roughly 2.5 hours to 45 minutes.
- Built and maintained atomic design systems across 3 products (vState, AccuRest, SnackHack) — component libraries, variants, Auto Layout, Figma Variables and tokens, and usage documentation — standardising enterprise UI patterns and cutting developer rework at handoff.
- Led UX for Snack Hack, a US-market B2C health-scanning product — benchmarked 3 competitors (Truthin, Yuka, Fooducate), then simplified the scan-to-result flow so users reach a clear verdict at the point of purchase; first-scan success improved from 65% to 92% and scan-to-decision time fell from 45 to 30 seconds.
- Redesigned search, filtering, and profile discovery for LocateTutor (US tutor marketplace, 2 platforms: web and mobile) — restructured filter logic and profile hierarchy, improving tutor-match accuracy in usability testing.
- Embedded AI into the design workflow — prompt engineering, AI-assisted ideation and research synthesis, and Figma MCP with Claude and Claude Code for design-to-code prototyping — shortening concept-to-prototype cycles.
- Mentored junior designers and interns, ran design reviews, and partnered with PMs, engineering, QA, and business stakeholders on requirement analysis and product decisions.

Esoftcode Web Solutions Pvt Ltd | Pune, India

UI/UX Designer | Mar 2023 – Feb 2024

- Designed NextBuilt CRM end-to-end and established a reusable component library spanning 8 core modules, reducing UI inconsistency by ~40% and accelerating delivery of new modules by ~25%.
- Ran UX research — competitive analysis, user interviews, and usability testing — to validate flows and resolve navigation and task-completion issues before development.
- Produced interactive prototypes, responsive layouts, and developer-ready Figma specifications; owned design-to-development handoff and translated business requirements from product and marketing stakeholders into scoped, buildable deliverables.

KnackBe Technologies Pvt Ltd | Pune, India

UI Designer | Jul 2021 – Mar 2023

- Redesigned Flourpicker, an FMCG e-commerce mobile app — restructured information architecture and visual hierarchy to improve category navigation and product discoverability.
- Supported launch with responsive landing pages and acquisition campaign creative (Google Ads, Meta), building early exposure to conversion and funnel metrics.

TOOLS & TECHNICAL EXPOSURE

Design: Figma · FigJam · Figma Dev Mode · Framer · Webflow · Adobe Photoshop · Notion · Jira

AI: Claude · Claude Design · Claude Code · Antigravity · Figma MCP · ChatGPT · Gemini · Figma AI · v0 by Vercel · Recraft

Frontend (supporting capability): HTML · CSS · JavaScript · React (working knowledge) · Bootstrap · Git · Netlify

EDUCATION

MBA, Business Analytics — IMERT, Pune | 2021 – 2024 · BE, Information Technology — MITCOE, Pune | 2016 – 2020
